## Objective: a 6-month internship in software development starting February 2017

### Professional Experience

- September 2015 – February 2016 **Intern in mobile application development**, *The Smiths*, Amsterdam (The Netherlands).  
Developed Android and iOS applications with the Appcelerator framework (Titanium).
  - Front-end with the following frameworks: Backbone, Underscore, Titanium/Alloy, React
  - Back-end with Express, hosted on parse.com
- September 2014 – June 2015 **Computer Science Manager**, *USEC*, Compiègne (France).  
In charge of software development projects for local companies.
  - Writing official documents (quotes, specifications, customer agreements, etc.)
  - Recruiting and mentoring students (those who develop our clients' projects)
- June 2013 – September 2014 **Android and web developer**, *Self-employed (Auto-entrepreneur)*, Nantes (France).  
Developed and then updated the Android application and the website of the startup WHO WANNA.
- April 2014 – June 2014 **Intern in software development**, *WhoWanna*, Nantes (France).
  - Migrated server-side code onto a "cloud" solution (Clever Cloud)
  - Updated the Android application (added some features, graphical update)
  - Started to change the language and the DBMS used on the server: from PHP to Scala and from MySQL to PostgreSQL

### Volunteer Experience

- March 2015 – June 2015 **President and co-organizer of tech talks**, *HumanTalks*, Compiègne (France).  
10-minute talks given once a month about programming languages, tools, software development, etc  
<http://humantalks.com/cities/compiègne>

### Education

- 2014 – present **Software Engineering**, *Université de Technologie de Compiègne*, Compiègne (France), Expected June 2017.
- 2012 – 2014 **Two-year core studies diploma in Computer Science (DUT Informatique)**, *Nantes University Institute of Technology (IUT de Nantes)*, Nantes (France).

### Computer Skills

- Languages **JavaScript (ES6), Java, PHP, HTML, CSS**, Python, Bash, C++ (Qt)
- Databases **PostgreSQL, MySQL**, SQLite (+ UML as a modeling language)
- OSs **GNU/Linux** (Xubuntu as my main OS, based on Debian)
- Other **Git, Apache2**, system administration (iptables, fail2ban, OpenVPN, TCP/IP), L<sup>A</sup>T<sub>E</sub>X

### Languages

- French **Native speaker**
- English **Fluent (European C1 level)** *Toeic 895/990 (March 2014)*

### Hobbies

- |                     |   |                           |   |
|---------------------|---|---------------------------|---|
| <b>Raspberry Pi</b> | Self-hosted websites, VPN, own-Cloud, proxy   | <b>Many side-projects</b> | Android applications, web browser add-ons, websites   |
| Conferences         | DevFest, Web2Day                              | Free software             | Fervent defender, most of my source code is on GitHub |
| Music               | I have been playing the guitar for nine years | Sport                     | Workout, cycling                                      |
