Objective: a 6-month internship in software development commencing Autumn 2015

Professional Experience

USEC

IT Project Manager

Compiègne

September 2014 – present

I'm in charge of software development projects. I help our clients throughout the process, ensuring total satisfaction from specifying their needs to testing and implementation. The tech part of each project is made by students.

- Writing official documents (quotes, specifications, customer agreements, etc.)
- Management of students

Self-employed (*Auto-entrepreneur*)

Android and web developer

Nantes

June 2013 – September 2014

I developed the Android application and the website of the startup WHOWANNA

WhoWanna

Intern in software development

Nantes

April 2014 – June 2014

- I migrated data onto a "cloud" solution
- I updated the Android application (added some features, graphical update)
- I changed the languages used on the server: from PHP to Scala and from MySQL to PostgreSQL
- I wrote internal documentation and set up a versioning system (Git)

Nantes University Institute of Technology (IUT de Nantes)

College project

Nantes

October 2013 – March 2014

Development of a streaming server on a Raspberry-Pi (group project). I carried out the server development (Tomcat/Java EE) and the Android application development (Java)

Education

Université Technologique de Compiègne

First year engineering student (Première année du cycle ingénieur)

Compiègne

2014 – present

Majoring in Computer Science

Nantes University Institute of Technology (IUT de Nantes)

Two-year core studies diploma in computer science (DUT Informatique)

Nantes

2012 – 2014
